5. General directions for use

5.1. Instructions for use

Dilute product with water to give a working solution of 0.5–3% of product (i.e. 0.5 – 3 parts of product with 99.5- 97 parts of water). It should then be applied by vacuum/pressure impregnation as necessary.

Mixing and loading should only be done with an automated dosing system for bulk storage tanks or IBC containers

5.2. Risk mitigation measures

When handling the undiluted product: wash hands after use.

use chemical resistant gloves and coverall.

dispose protective gloves after use.

Do not use directly on or near food, feed or drinks, or on surfaces or utensils likely to be in direct contact with food, feed, drinks and livestock.

The person responsible for placing the treated wood on the market must ensure that the treated wood is not intended for uses involving contact with food, feed or livestock.

Application solutions must be collected and reused or disposed of as hazardous waste. They must not be released to soil, ground- and surface water or any kind of sewer.

Storage of treated wood must be either; under shelter or on impermeable hard standing to prevent direct losses to soil, sewer or water, and that any losses of the product, including any contaminated water/soil must be collected for reuse or disposal in accordance with local/national requirements.

The biocidal product may only be applied to timber which will not be used in direct contact with surface waters.
