Q:

In point 3.3, Evaluation of the Tenders, Page 32 - table 3, you specify that the Classification of each price offer (points to be awarded) will be calculated based on the formula:

$P = (P_{min}/P_o) \times 70$, where P_o is the price of each offer (total price)

Could you please explain how will P_o be calculated given that each tenderer will provide 4 different prices (consultant/senior consultant working on site/ off site)?

A:

The total price (P_o) is the total of the off site and the on site maximum unit prices per person-day of the junior and senior consultants, without any weighting being applied to the unit prices.
