

Regulation (EU) No 528/2012 concerning the
making available on the market and use of
biocidal products

**PRODUCT ASSESSMENT REPORT OF A
BIOCIDAL PRODUCT FOR THE RENEWAL OF
NATIONAL AUTHORISATION APPLICATION**

RATER STRONG GRANULAT

Product type 14 Rodenticide

Bromadiolone as included in the Union list of approved
active substances

Case Number in R4BP: BC-GT038790-19

Evaluating Competent Authority: Poland

Date: 12/12/2019

CONCLUSION

The biocidal product RATER STRONG GRANULAT to be authorised in Poland is identical to the biocidal product AGRORAT BD-5 PELLETT PRO (Case Number in R4BP: BC-TS014244-23, Asset Number in R4BP: ES-0008047-0000, Authorisation number: ES/APP(NA)-2018-14-00155) authorised in Spain. The Polish CA agrees with the Product Assessment Report for the renewal of the authorisation of the biocidal product AGRORAT BD-5 PELLETT PRO conducted by the Spanish CA and renews the authorisation of the product RATER STRONG GRANULAT in Poland.

Specific conditions applying to the active substance bromadiolone laid down in the Commission Implementing Regulation (EU) No. 2017/1380 were considered for the re-assessment of the biocidal product AGRORAT BD-5 PELLETT PRO.

The assessment presented in the Product Assessment Report has shown that the ready-to-use product, AGRORAT BD-5 PELLETT PRO containing 0.005% w/w of the active substance bromadiolone, may be authorised for use as a rodenticide (product-type 14) since the conclusions of initial evaluation remain valid.

Authorisation for RATER STRONG GRANULAT is granted in Poland as a rodenticide product against house mice (*Mus musculus*) and brown rats (*Rattus norvegicus*). It is to be used indoors and outdoors around buildings by professionals. It is a ready to use grain bait to be used in tamper-resistant bait stations. The Polish CA renews the first authorization of the product RATER STRONG GRANULAT based on the Product Assessment Report for the renewal of the authorisation of the biocidal product AGRORAT BD-5 PELLETT PRO.

Anticoagulant rodenticides are considered essential to ensure appropriate rodent control by efficient pest management and as a consequence, to prevent or control any serious danger to human and animal health which rodents may cause.

Non-renewal of anticoagulant rodenticides could lead to insufficient rodent control. It could not only cause significant negative impact on human or animal health, or the environment, but could also affect the public's perception of its safety with regard to exposure to rodents or the security of a number of economic activities that could be vulnerable to rodents, resulting in economic and social consequences.

Conditions for the renewal of the biocidal product RATER STRONG GRANULAT in Poland:

The biocidal product will be authorised according to Article 19 (5) of Regulation (EU) No. 528/2012 (BPR) in conjunction with Article 23 (6) of the BPR. According to Article 23 (6) of the BPR, the authorisation of the product will be renewed for 5 years.

For the full report and details of the product assessment please see the documentation recorded in R4BP under Asset Number: ES-0008047-0000.
