

# Summary of product characteristics for a biocidal product family

**Family name:** Repellent Masterbatches Antirat BPF

**Product type(s):** PT19 - Repellents and attractants (Pest control)

**Authorisation number:** NL-0015777-0000

**R4BP 3 asset reference number:** EU-0015777-0000

## Table Of Contents

Part I.- First information level	1
1. Administrative information	1
2. Product family composition and formulation	2
Part II.- Second information level - meta SPC(s)	2
1. Meta SPC administrative information - <b>meta SPC 1</b>	3
2. Meta SPC composition	3
3. Hazard and precautionary statements of the meta SPC	3
4. Authorised use(s) of the meta SPC	4
5. General directions for use of the meta SPC	6
6. Other information	7
7. Third information level: individual products in the meta SPC	7

## Part I.- First information level

### 1. Administrative information

#### 1.1. Family name

Repellent Masterbatches Antirat BPF

#### 1.2. Product type(s)

PT19 - Repellents and attractants (Pest control)

#### 1.3. Authorisation holder

##### Name and address of the authorisation holder

Name	Avient Luxembourg S.a.r.l.
Address	Route de Bastogne, 19 L-9638 Pommerloch Luxembourg

##### Authorisation number

NL-0015777-0000

##### R4BP 3 asset reference number

EU-0015777-0000

##### Date of the authorisation

01/06/2018

##### Expiry date of the authorisation

30/05/2028

#### 1.4. Manufacturer(s) of the biocidal products

##### Name of the manufacturer

C Tech Corporation

##### Address of the manufacturer

5-b, Himgiri, 1277 Hatiskar Marg, Prabhadevi, 400025 Mumbai India

##### Location of manufacturing sites

Unit No.162, Plot No.259 Surat Special Economic Zone Surat SEZ, Sachin, 394230 Gujarat India

### 1.5. Manufacturer(s) of the active substance(s)

<b>Active substance</b>	1429 - Lavender oil (Natural oil)
<b>Name of the manufacturer</b>	Ishanee Chemical Private Limited
<b>Address of the manufacturer</b>	No.1 New Anand Bhawan Shivaji Park Road No.4 400028 Dadar India
<b>Location of manufacturing sites</b>	No.1 New Anand Bhawan Shivaji Park Road No.4 400028 Dadar India
<b>Active substance</b>	1430 - Peppermint oil (Natural oil)
<b>Name of the manufacturer</b>	Ishanee Chemical Private Limited
<b>Address of the manufacturer</b>	No.1 New Anand Bhawan Shivaji Park Road No.4 400028 Dadar India
<b>Location of manufacturing sites</b>	No.1 New Anand Bhawan Shivaji Park Road No.4 400028 Dadar India

## 2. Product family composition and formulation

### 2.1. Qualitative and quantitative information on the composition of the family

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
Lavender oil (Natural oil)		Active Substance	8000-28-0		3,6 - 3,6
Peppermint oil (Natural oil)		Active Substance	8006-90-4		4,5 - 4,5

### 2.2. Type(s) of formulation

XX
----

## Part II.- Second information level - meta SPC(s)

## 1. Meta SPC administrative information

### 1.1. Meta SPC identifier

meta SPC 1

### 1.2. Suffix to the authorisation number

1-1

### 1.3 Product type(s)

PT19 - Repellents and attractants (Pest control)

## 2. Meta SPC composition

### 2.1. Qualitative and quantitative information on the composition of the meta SPC

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
Lavender oil (Natural oil)		Active Substance	8000-28-0		3,6 - 3,6
Peppermint oil (Natural oil)		Active Substance	8006-90-4		4,5 - 4,5

### 2.2. Type(s) of formulation of the meta SPC

Formulation(s)

XX

## 3. Hazard and precautionary statements of the meta SPC

Hazard statements

Precautionary statements

## 4. Authorised use(s) of the meta SPC

### 4.1 Use description

#### Use 1 - masterbatches for repelling rats

<b>Product type</b>	PT19 - Repellents and attractants (Pest control)
<b>Where relevant, an exact description of the authorised use</b>	Repellent
<b>Target organism(s) (including development stage)</b>	Scientific name: Rattus sp Common name: Rats Development stage: Juveniles  Scientific name: Rattus sp Common name: Rats Development stage: Adults
<b>Field(s) of use</b>	Indoor  Master batches with repellent properties for incorporation in plastic (e.g. cables and wire coatings), with the aim to protect the final treated articles against rats by repelling them. Protection should be understood as a protection from damage which could potentially affect the operating ability of the cable.
<b>Application method(s)</b>	Method: Closed system Detailed description: The masterbatch pellets are incorporated into the plastic material through an extrusion dosing device to obtain a fine and homogeneous dispersion in the final macromolecular matrix. The temperature during the extrusion process goes from around 150°C to 200°C for flexible PVC compounds and from around 160°C up to 250°C for PE compounds. The heating lasts for about 3 to 5 minutes. As soon as the molten plastic is applied in the crosshead part of the extruder onto the cable core, the extruded plastic and cable move into a cooling through, and are immediately cooled down in water. The limited temperature range combined with the very short exposure time ensure incorporation of the active substances without degradation. The incorporation of the pellets into the polymer material is an industrial process during which the pellets are mechanically conveyed to the enclosed and hermetic space of the extruder barrel; therefore no direct contact with the pellets is required and the exposure can be considered negligible.
<b>Application rate(s) and frequencies</b>	Application Rate: The concentration of the master batch in the final compound is in the range 3 – 4 %. Dilution (%): - Number and timing of application: Single application
<b>Category(ies) of users</b>	Industrial  Polyethylene sealed bags (LDPE) - 25 kg

## 5. General directions for use of the meta SPC

### 5.1. Instructions for use

Add the plastics pellets to the plastic material through an extrusion dosing device to obtain a fine and homogeneous dispersion in the final macromolecular matrix. Typical dosing of the master batch in the final compound is in 3 – 4 % range.  
The form itself of the pellets is designed to enable their homogeneous dispersion in the plastics pellets in which they will be added. The masterbatch products are currently only based on EVA or LDPE polymers. EVA based masterbatches can be used in most matrices, LDPE specifically in polyolefins. The masterbatches based on ethylene vinyl acetate (EVA) or polyethylene (LDPE) as the plastic matrix of the masterbatch can therefore be used in all commonly used cable cover materials.  
The generation of waste should be avoided or minimized wherever possible.

### 5.2. Risk mitigation measures

No specif hazards identified; Chemicals are not readily available as they are bound within the polymer matrix. x  
No specific measures required.

### 5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

No specific hazards identified; General procedures apply.  
Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.  
Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.  
Skin contact : Flush contaminated skin or hair with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.  
Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. if material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

### 5.4. Instructions for safe disposal of the product and its packaging

Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

## 5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Store in accordance with local regulations. Store in original bag protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Keep bag tightly closed and sealed until ready for use. Bags that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled bags. Use appropriate containment to avoid environmental contamination.

Shelf life: 2 years

## 6. Other information

## 7. Third information level: individual products in the meta SPC

### 7.1 Trade name(s), authorisation number and specific composition of each individual product

<b>Trade name(s)</b>	87477 EVA ANTIRAT MASTERBATCH	Market area: EU
<b>Authorisation number</b> <small>(R4BP 3 asset reference number - National Authorisation)</small>	EU-0015777-0001 1-1	

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
