

Milan, June 13<sup>th</sup> 2017 .

Dear Sir, dear Madam,

With this document the Company Copyr S.p.A. would like to support the active substance (PT18) *Chlorfenapyr*, CAS n° 122453-73-0.

Copyr considers the product **Mythic 10 SC**, containing this active, as an important and distinctive element of its catalog.

We believe that the characteristics of Chlorfenapyr give to the formulation various unique properties.

In particular, we think we have to emphasize the long residuality and absence of perceptiveness by the insects (it's not detectable). Another very good characteristic is the absence of smell of this solution.

We find the product very interesting, in particular to be used in conjunction with gel baits against cockroaches and ants.

We also hope for a new registration against bed bugs.
