**Amendment of the Icelandic authorisation for the Union authorised biocidal product family Lactic acid based products – CID LINES NV**

Regulation (EU) No 528/2012 concerning the making available on the market and use of biocidal products is implemented into Icelandic legislation through Icelandic Regulation No 878/2014 on biocidal products.

The biocidal product family is authorised in Iceland with an implementing decision in EEA countries and Switzerland (EE-APP), with reference to the Union Authorisation – EU-0027740-0000 granted with Commission Implementing Regulation (EU) 2022/1391.

The Environment Agency of Iceland (Umhverfisstofnun) received an application for amendment of the implemented decision on 3 May 2023, Case No BC-TM086099-08. The amendment concerns a notification of a biocidal product within the biocidal product family.

The notified biocidal product, **Valiant ULTRA EVERYDAY**, has been added to the biocidal product family, Lactic acid based products, under *meta SPC 9*. The product may be placed on the Icelandic market subject to the conditions specified in the authorisation letter for the biocidal product family, dated 5. December 2022.

The revised Summary of Product Characteristics (SPC) is uploaded to R4BP3.

Sincerely,

Hafdís Inga Ingvarsdóttir
