

# Summary of product characteristics for a biocidal product

**Product name:** MASSOCIDE T05

**Product type(s):** PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

**Authorisation number:** ES/APP(NA)-2022-18-00850

**R4BP 3 asset reference number:** ES-0028855-0000

## Administrative information

### 1.1. Trade names of the product

|  |
|--|
| MASSOCIDE T05                          |
| PREBEN RASTREROS INSECTICIDA EN POLVO  |
| PREBEN CUCARACHAS INSECTICIDA EN POLVO |
| PREBEN HORMIGAS INSECTICIDA EN POLVO   |
| PAPARRIN SECURE T05                    |
| MASSOCIDE PER T05                      |

### 1.2. Authorisation holder

|   |                          |  |
|---|--------------------------|--|
| <b>Name and address of the authorisation holder</b> | Name                     | COMERCIAL QUIMICA MASSÓ SA             |
|   | Address                  | VILADOMAT 321 5º 08029 BARCELONA Spain |
| <b>Authorisation number</b>                         | ES/APP(NA)-2022-18-00850 |  |
| <b>R4BP 3 asset reference number</b>                | ES-0028855-0000          |  |
| <b>Date of the authorisation</b>                    | 21/12/2022               |  |
| <b>Expiry date of the authorisation</b>             | 21/12/2032               |  |

### 1.3. Manufacturer(s) of the biocidal products

|  |   |
|--|---|
| <b>Name of the manufacturer</b>        | COMERCIAL QUÍMICA MASSÓ S.A.  |
| <b>Address of the manufacturer</b>     | VILADOMAT 321 5ª 08029 Barcelona Spain  |
| <b>Location of manufacturing sites</b> | Avda CADÍ 12-14 P.I. SANT PERE MOLANTA 08799 OLÈRDOLA (BARCELONA) barcelona Spain |

#### 1.4. Manufacturer(s) of the active substance(s)

|  |   |
|--|---|
| <b>Active substance</b>                | 1342 - Permethrin   |
| <b>Name of the manufacturer</b>        | LIMARU NV (Acting for Tagros Chemicals India Private Limited)   |
| <b>Address of the manufacturer</b>     | Ziepstraat,5 3680 Neetoeteren Belgium   |
| <b>Location of manufacturing sites</b> | Tagros Chemicals India Limited, "Jhaver Centre", IV floor, Annamalai Building No. 72 Marshalls Road, Egmore, Chennai - 600 008, India. A4/1&2, SIPCOT Industrial Complex, Kudikadu, Cuddalore – 607 005 Tamil Nadu, India India |

## 2. Product composition and formulation

### 2.1. Qualitative and quantitative information on the composition of the biocidal product

| Common name | IUPAC name | Function         | CAS number | EC number | Content (%) |
|-------------|------------|------------------|------------|-----------|-------------|
| Permethrin  |            | Active Substance | 52645-53-1 | 258-067-9 | 0,5         |

### 2.2. Type of formulation

|                      |
|----------------------|
| DP - Dustable powder |
|----------------------|

## 3. Hazard and precautionary statements

|                                 |   |
|---------------------------------|---|
| <b>Hazard statements</b>        | Very toxic to aquatic life with long lasting effects.<br>Contains permethrin. May produce an allergic reaction.   |
| <b>Precautionary statements</b> | Avoid release to the environment.<br>Collect spillage.<br>Dispose of contents to y/o su recipiente como residuo peligroso de acuerdo con la normativa vigente. Profesional y público en general.<br>Dispose of contents to y/o su recipiente a través de un gestor autorizado de residuos peligrosos, de acuerdo con la normativa vigente. Profesional especializado. |

## 4. Authorised use(s)

### 4.1 Use description

#### Use 1 - Use # 1 – Indoor – spot to surface in hiding places – crawling insects - cockroaches – Professionals / Trained Professionals

|   |   |
|---|---|
| <b>Product type</b>   | PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)   |
| <b>Where relevant, an exact description of the authorised use</b> | The product is applied by spot treatment against crawling insects in empty rooms at industrial and domestic facilities as kitchens and store rooms. It is applied in hiding places and areas as garages, lofts, attics, garrets, kitchens... where crawling insects are looking for food, paying special attention to grooves and cracks and areas behind or under machinery, kitchen equipment or pipes. |
| <b>Target organism(s) (including development stage)</b>           | Scientific name: <i>Blattella germanica</i><br>Common name: .<br>Development stage: adultos y ninfas<br><br>Scientific name: <i>Blatta orientalis</i><br>Common name: .<br>Development stage: adultos y ninfas  |
| <b>Field(s) of use</b>  | Indoor<br><br>Field(s) of use          Indoor – spot to surface in hiding places  |
| <b>Application method(s)</b>                                      | Method: dusting<br>Detailed description:<br><br>Dusting.<br>The product is applied by dusting downwards on corners (spot treatment) and in hiding places (including crack and crevices) wherein the insects use to hide using handheld duster, bulb duster or powder container.   |
| <b>Application rate(s) and frequencies</b>                        | Application Rate: 10g/m <sup>2</sup><br>Dilution (%): .<br>Number and timing of application:<br><br>10 g/m <sup>2</sup> (equivalent to 20 rotations/m <sup>2</sup> with the dust dispenser)<br>If invasion persists, re-apply the product if necessary every 5 weeks.   |

**Category(ies) of users**

Trained professional  
Professional

**Pack sizes and packaging material**

**Pack sizes and packaging material**  
Professionals:  
Tube/bottle, plastic (dust dispenser): 250 g, 350 g, 500 g  
  
Trained Professionals:  
Tube/bottle, plastic (dust dispenser): 250 g, 350 g, 500 g  
Bag, aluminium+plastic. 250 g, 500 g, 1 kg, 5 kg  
Bag (plastic) inside case (cardboard): 500 g, 1 kg, 5 kg  
Bag (plastic): 5 kg, 20 kg  
  
See also section 6 for more information.

**4.1.1 Use-specific instructions for use**

The application is restricted to areas that are not wet cleaned.  
The product has to be applied only on restricted areas on surfaces not regularly cleaned, for example behind or under the fridge, under the kitchen sink, under the oven or the water heater, in all cracks and crevices that can be a harborage for cockroaches. Remove (clean) product and dead insects, when the presence of live insects is stopped.  
**Do not use of wet cleaning procedures. Use only dry-cleaning procedures (vacuum or broom) or use damp paper. After cleaning, dispose the collected residues or the damp papers used as hazardous wastes in accordance with current regulation.**

**4.1.2 Use-specific risk mitigation measures**

The application is restricted to areas that are not wet cleaned.  
Remove (clean) product and dead insects when the presence of live insects is stopped.  
Cover the soil with a plastic sheet before mixing and loading the biocidal product prior to application.

**4.1.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment**

Refer to general direction of use

#### 4.1.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Trained Professional:  
 Empty containers, unused product, washing water, containers and other waste generated during the treatment are considered hazardous waste. Deliver those wastes to a registered establishment or undertaking, in accordance with current regulations. Code the waste according Decision 2014/955/EU.  
 Do not release to soil, ground, surface water or any kind of sewer.

Professional:  
 Empty containers, unused product and other waste generated during the treatment are considered hazardous waste. Dispose of in accordance with current regulations.  
 Do not release into soil, ground, surface water or any kind of sewer .

#### 4.1.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Refer to general direction of use

#### 4.2 Use description

##### Use 2 - Use # 2 – Indoor – spot to surface in hiding places – crawling insects - cockroaches – General public (Non-professional users)

|   |   |
|---|---|
| <b>Product type</b>   | PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)   |
| <b>Where relevant, an exact description of the authorised use</b> | The product is a ready-to-use product to be dusted over at domestic facilities as kitchens and store rooms. It is applied in hiding places and areas as garages, lofts, attics, garrets, kitchens... where crawling insects are looking for food, paying special attention to grooves and cracks and areas behind or under machinery, kitchen equipment or pipes. |

#### 4.2.1 Use-specific instructions for use

The application is restricted to areas that are not wet cleaned.  
The product has to be applied only on restricted areas on surfaces not regularly cleaned, for example behind or under the fridge, under the kitchen sink, under the oven or the water heater, in all cracks and crevices that can be a harborage for cockroaches.  
Remove (clean) product and dead insects, when the presence of live insects is stopped.

#### 4.2.2 Use-specific risk mitigation measures

The application is restricted to areas that are not wet cleaned.  
Remove (clean) product and dead insects when the presence of live insects is stopped.  
Because the product is intended for use by consumers (non-professionals), it is necessary to make clear that there might be a risk of building up resistance and that this can be reduced. Since consumers have no knowledge of resistance issues the label claim should contain information to prevent it. To this aim the following phrase is proposed: "To avoid resistance occurrence, keep the label instructions and avoid repeated use of products containing permethrin. Alternate with products containing different active substances. When the infestation persists contact a (trained) professional."

#### 4.2.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Refer to general direction of use

#### 4.2.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Empty containers, unused product and other waste generated during the treatment are considered hazardous waste. Dispose of in accordance with current regulations.  
Do not release into soil, ground, surface water or any kind of sewer.

#### 4.2.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Refer to general direction of use

### 4.3 Use description

#### Use 3 - Use # 3 – Outdoor – Directly application in ant nests – Professionals / Trained Professionals

##### Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

##### Where relevant, an exact description of the authorised use

The product is dusted directly into the ant nests.

##### Target organism(s) (including development stage)

Scientific name: *Lasius niger*  
Common name: Black ants  
Development stage: - adults, larvae, nymphs, queen

##### Field(s) of use

Outdoor

Outdoor  
The product is applied directly to the ant nests, around houses on paved ways, balconies, and terraces where ant nests are located.

|  |   |
|--|---|
| <b>Application method(s)</b>               | Method: Dusting<br>Detailed description:<br><br>.   |
| <b>Application rate(s) and frequencies</b> | Application Rate: Apply 2.5 g maximum per nest (in 0.25 m <sup>2</sup> , e.g. 50cm*50cm)<br>Dilution (%): -<br>Number and timing of application:<br><br>Apply 2.5 g maximum per nest (in 0.25 m <sup>2</sup> , e.g. 50cm*50cm), equivalent to 5 rotations per nest when the duster dispenser is used (application rate: 10 g/m <sup>2</sup> )<br><br>Repeat the treatment 1-2 times per year. |
| <b>Category(ies) of users</b>              | Trained professional<br><br>Professional  |
| <b>Pack sizes and packaging material</b>   | <u>Professional:</u><br>Tube/bottle, plastic (dust dispenser): 250 g, 350 g, 500 g<br><br><u>Trained Professionals:</u><br>Tube/bottle, plastic (dust dispenser): 250 g, 350 g, 500 g<br>Bag, aluminium+plastic. 250 g, 500 g, 1 kg, 5 kg<br>Bag (plastic) inside case (cardboard): 500 g, 1 kg, 5 kg<br>Bag (plastic): 5 kg, 20 kg<br>See also section 6 for more information.               |

#### 4.3.1 Use-specific instructions for use

To achieve full effect, identify the ant nest's location carefully and apply the product there.  
After product's application, cover the treated area with a plastic tarp or small bucket to avoid that the product could be carried away by rainwater or air.

#### 4.3.2 Use-specific risk mitigation measures

Cover the soil with a plastic sheet before mixing and loading the biocidal product prior to application.

#### 4.3.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Refer to general direction of use.

#### 4.3.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Professional:

Empty containers, unused product and other waste generated during the treatment are considered hazardous waste. Dispose of in accordance with current regulations.

Do not release into soil, ground, surface water or any kind of sewer.

Trained Professional:

Empty containers, unused product, washing water, containers and other waste generated during the treatment are considered hazardous waste. Deliver those wastes to a registered establishment or undertaking, in accordance with current regulations.

Code the waste according Decision 2014/955/EU.

Do not release to soil, ground, surface water or any kind of sewer.

#### 4.3.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Refer to general direction of use.

#### 4.4 Use description

##### Use 4 - Use # 4 – Outdoor – Directly application in ant nests – General public (non- professional users)

**Product type**

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

**Where relevant, an exact description of the authorised use**

The product is dusted directly into the ant nests.

**Target organism(s) (including development stage)**

Scientific name: *Lasius niger*  
Common name: hormiga negra  
Development stage: adultos, larvas, ninfas, reinas

|  |  |
|--|--|
| <b>Field(s) of use</b>                     | Outdoor<br><br>The product is applied directly to the ant nests, around houses on paved ways, balconies, and terraces where ant nests are located.   |

#### 4.4.1 Use-specific instructions for use

To achieve full effect, identify the ant nest's location carefully and apply the product there.  
After product's application, cover the treated area with a plastic tarp or small bucket to avoid that the product could be carried away by rainwater or air.

#### 4.4.2 Use-specific risk mitigation measures

Because the product is intended for use by consumers (non-professionals), it is necessary to make clear that there might be a risk of building up resistance and that this can be reduced. Since consumers have no knowledge of resistance issues the label claim should contain information to prevent it. To this aim the following phrase is proposed: "To avoid resistance occurrence, keep the label instructions and avoid repeated use of products containing permethrin. Alternate with products containing different active substances. When the infestation persists contact a (trained) professional."

#### 4.4.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Refer to general direction of use.

#### 4.4.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Empty containers, unused product and other waste generated during the treatment are considered hazardous waste. Dispose of in accordance with current regulations.  
Do not release into soil, ground, surface water or any kind of sewer.

#### 4.4.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Refer to general direction of use

### 4.5 Use description

#### Use 5 - Use # 5 – Indoor – Non-washable textile surfaces – General public (non- professional users)

##### Product type

PT18 - Insecticides, acaricides and products to control other arthropods (Pest control)

##### Where relevant, an exact description of the authorised use

The product is applied at domestic use (houses, flats, apartments) over textile surfaces that must be cleaned by dry treatments as mattresses, blankets, bedspreads, bedsteads, pillows, carpets, moquette...

##### Target organism(s) (including development stage)

Scientific name: Dermatophagoides pteronyssinus -  
Common name: .  
Development stage: adultos y ninfas

Scientific name: Ixodes ricinus  
Common name: .  
Development stage: adultos y ninfas

Scientific name: Rhipicephalus sanguineus -  
Common name: .  
Development stage: adultos y ninfas

Scientific name: Ctenocephalides felis -  
Common name: Cat flea

|  |  |
|--|--|
|  | Development stage: Adults  |
| <b>Field(s) of use</b>                     | Indoor<br>Field(s) of use      Indoors – non-washable textile surfaces (surface treatment)   |
| <b>Application method(s)</b>               | Method: Dusting<br>Detailed description:<br><br>Dusting<br>The product is a ready-to-use product to be dusted over the mattresses, carpet, moquette,... directly from the ready-to-use powder container. Once the efficacy time is over keep the product up to 24 h maximum and after that, the treated surface must be vacuumed with the vacuum cleaner in order to release killed insects and product's residue. |
| <b>Application rate(s) and frequencies</b> | Application Rate: 10g/m <sup>2</sup><br>Dilution (%): .<br>Number and timing of application:<br><br>10 g/m <sup>2</sup> (equivalent to 20 rotations/m <sup>2</sup> with the dust dispenser)<br>This use is intended to be applied once per year.   |
| <b>Category(ies) of users</b>              | General public (non-professional)  |
| <b>Pack sizes and packaging material</b>   | Tube/bottle , plastic. (dust dispenser): 250 g, 350 g, 500 g<br>See also section 6 for more information.   |

#### 4.5.1 Use-specific instructions for use

Apply to infested rugs paying special attention to edges and wall-to-wall rugs.

**Do not use of wet cleaning procedures. Use only dry-cleaning procedures (vacuum or broom) or use damp paper. After cleaning, dispose the collected residues or the damp papers used as hazardous wastes in accordance with current regulation.**

#### 4.5.2 Use-specific risk mitigation measures

Because the product is intended for use by consumers (non-professionals), it is necessary to make clear that there might be a risk of building up resistance and that this can be reduced. Since consumers have no knowledge of resistance issues the label claim should contain information to prevent it. To this aim the following phrase is proposed: "To avoid resistance occurrence, keep the label instructions and avoid repeated use of products containing permethrin. Alternate with products containing different active substances. When the infestation persists contact a (trained) professional."

#### 4.5.3 Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Refer to general direction of use

#### 4.5.4 Where specific to the use, the instructions for safe disposal of the product and its packaging

Empty containers, unused product and other waste generated during the treatment are considered hazardous waste. Dispose of in accordance with current regulations.  
Do not release into soil, ground, surface water or any kind of sewer.

#### 4.5.5 Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

Refer to general direction of use

### 5. General directions for use

#### 5.1. Instructions for use

Always read the label or leaflet before use and follow all the instructions provided.  
The product has to be applied by spreading the powder evenly on the surfaces and all those areas where insects usually nest.  
The product should be applied at 10 g/m<sup>2</sup>. For non-professionals equivalent to spread the surface during 20 rotations /m<sup>2</sup> (spot to surface in hiding places non-washable textile surfaces) or 5 rotations (ant nest) when using dust dispenser For other application devices, fill the required quantity using the dosage spoon.  
Further specific information for each use can be found in respective section of the use.  
The biocidal product contains permethrin (synthetic pyrethroid). DO NOT USE if under medical advice NOT to work with such compounds.

## 5.2. Risk mitigation measures

Do not spread onto people and pets.  
Do not use/apply directly on or near food, feed or drinks, or on surfaces or utensils likely to be in direct contact with food, feed, drinks and animals.  
Keep cats away from treated surfaces. Due to their particular sensitivity to pyrethroids, the product can cause severe adverse reactions in cats.  
Remove or cover terrariums, aquariums and animal cages before application. Turn off aquarium air-filter while spraying.  
Contains permethrin, may be dangerous/toxic to pets (e.g. cats, bees, fish and other aquatic organisms).  
Keep uninvolved persons, children and pets away from treated surfaces/areas until dried.  
**Use Personal Protection Equipment (PPE) for (trained) professional users**  
Use clean personal protective equipment in good condition.  
Store personal protective equipment in a clean place, away from the work area.  
During use, do not eat, drink or smoke. Remove and wash contaminated clothing before reuse. Provide adequate ventilation, especially in closed areas.  
Hand protection: Wear protective chemical resistant gloves during product handling phase (glove material to be specified by the authorisation holder within the product information).

## 5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

**IF INHALED:** If symptoms occur call a POISON CENTRE or a doctor.

**IF SWALLOWED :** If symptoms occur call a POISON CENTRE or a doctor.

**IF ON SKIN:** Take off all contaminated clothing and wash it before reuse. Wash skin with water. If skin irritation or rash occur: Get medical advice.

**IF IN EYES:** If symptoms occur rinse with water. Remove contact lenses, if present and easy to do. Call a POISON CENTRE or a doctor.

Pyrethroids may cause paresthesia (burning and prickling of the skin without irritation). If symptoms persist: Get medical advice.

**IF MEDICAL ADVICE IS NEEDED, HAVE THE PRODUCT CONTAINER OR LABEL AT HAND AND CONTACT THE POISON CONTROL CENTER**

Emergency measures to protect the environment:

- Avoid to contaminate soil/ groundwater.
- Prevent spills into surface water or the drainage system.
- If the product gets into water or soil, it should be removed mechanically. Transfer to a suitably labelled container and dispose of as hazardous waste according to current legislation.

## 5.4. Instructions for safe disposal of the product and its packaging

Please, see specific instructions for safe disposal of the product and its packaging provided above (specific sections).

## 5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Shelf life: 3 years.

Store in the original container in dry, well-ventilated place.

Store original container tightly closed. Keep away from sun radiation and all other heat sources.

Keep out of reach of children and non-target animals/pets.

Store away from food, drink and animal feedstuffs.

## 6. Other information

According to national legislation, in Spain there are until three user categories:

- Trained professional users (TP): pest control operators, having received specific training in biocidal product uses according to the national legislation in force.

- Professional users (P or NTP): professionals that use the biocidal products in the context of his profession, that is not pest control operator, and that are unlikely to have received any specific training in biocidal product use according to the national legislation in force. It can be expected that they have some knowledge and skills handling chemicals (if they must use it in their job) and they are able to use correctly some kind of PPE if necessary.

- Non-professional users (NP): users who are not professionals and that apply the biocidal product is in his private life.
