MemberStateName	Belgium
ProductType	PT08

GeneralComments	In 2017, the BE CA performed a comparative assessment for the PT8 product Diffusit M containing the active substances boric acid and disodium tetraborate pentahydrate. The product is to be used by professional users as a curative treatment for wood used in classes 1 and 2. The comparative assessment concluded that, based on our available information at that time, no eligible alternatives to this product existed. We don't have any more recent information at this time.
