5.5. Conditions of storage and shelf-life of the product under normal conditions of storage	9
6. OTHER INFORMATION	10

1. ADMINISTRATIVE INFORMATION

1.1. Trade name(s) of the product

Trade name(s)	ALROD Deadline Alpha Express Bait Blocks
---------------	---

1.2. Authorisation holder

Name and address of the authorisation holder	Name	SBM DEVELOPPEMENT
	Address	60 chemin des Mouilles 69130 Ecully France
Authorisation number	IE/BPA 70113	
<i>R4BP asset number</i>	IE-0007441-0000	
Date of the authorisation	17/06/2013	
Expiry date of the authorisation	30/06/2026	

1.3. Manufacturer(s) of the product

Name of manufacturer	RENTOKIL - INITIAL SUPPLIES
Address of manufacturer	Webber Road, Knowsley Ind. Park L33 7SR Kirkby, Merseyside United Kingdom of Great Britain and Northern Ireland (the)
Location of manufacturing sites	Webber Road, Knowsley Ind. Park L33 7SR Kirkby, Merseyside United Kingdom of Great Britain and Northern Ireland (the)

Name of manufacturer	IRIS
Address of manufacturer	1126 A, avenue du Moulinas, route de St Privas 30340 Salindres France
Location of manufacturing sites	1126 A, avenue du Moulinas, route de St Privas 30340 Salindres France

1.4. Manufacturer(s) of the active substance(s)

Active substance	alphachloralose
Name of manufacturer	SBM Développement
Address of manufacturer	60 Chemin des Mouilles 69130 Ecully France
Location of manufacturing sites	Sarex OverSeas - 501,502 Waterford, C Wing - C.D. - Barfiwala Marg - Juhu Lane - Andheri (W) 400058 Mumbai India

2. PRODUCT COMPOSITION AND FORMULATION

2.1. Qualitative and quantitative information on the composition of the product

Common name	IUPAC name	Function	CAS number	EC number	Content (%)
alphachloralose	(R)-1,2-O-(2,2,2-Trichloroethylidene)- α-D-glucofuranose	active substance	15879-93-3	240-016-7	4

2.2. Type(s) of formulation

BB - Block Bait

3. HAZARD AND PRECAUTIONARY STATEMENTS

Hazard statements	H410: Very toxic to aquatic life with long lasting effects.
Precautionary statements	P273: Avoid release to the environment. P391: Collect spillage. P501: Dispose of contents to in accordance with all local/regional/national regulations. P101: If medical advice is needed, have product container or label at hand. P102: Keep out of reach of children. P270: Do not eat, drink or smoke when using this product. P314: Get medical attention if you feel unwell.

4. AUTHORISED USE(S)

4.1. Use description

Table 1. Indoor use

Product type	PT14: Rodenticides
Where relevant, an exact description of the authorised use	Deadline Alpha Express Bait Blocks is a bait block containing alphachloralose (4% w/w) to be used only indoors in tamper resistant bait box by professionals for the control of mice.
Target organism(s) (including development stage)	Scientific name: <i>Mus musculus</i> Common name: house mouse Development stage: II.1 Juveniles and II.2 Adults
Field(s) of use	indoor use IV.1 Indoor use VI.2 Covered applications VI.2.1 In bait stations
Application method(s)	Method: in bait boxes Detailed description: IV.1 Indoor use VI.2 Covered applications VI.2.1 In bait stations Place tamper resistant bait box (TRBB) containing up to a maximum of 20g of bait (1 or 2 x 5g or 10g) per box at appropriate intervals. Bait stations are manually placed in the rodent-infested area in covered protected positions at distances of no more than 3 metres. Ideally bait boxes should be fixed to the ground. After treatment, if further rodent control is necessary a rodenticide with a different mode of action should be employed in order to alternate treatment regimes. Tamper-resistant commercially available bait stations (pre-filled or refillable) are authorised. Bait stations are manually placed in the rodent infested area. Ideally bait stations should be fixed to the ground. The product must never be placed indiscriminately. Please Refer to Addendum to Annex II – Table 2: Application rate(s) and frequency.
Application rate(s) and frequency	Application Rate: up to 20g Dilution (%): - Number and timing of application: Bait stations are manually placed in the rodent-infested area in covered protected positions at distances of no more than 3 metres.
Category(ies) of users	trained professional ; professional
Pack sizes and packaging material	Box, Paper, cardboard , 60g Packet, PE , 60g Deadline Alpha Express Bait Blocks will be supplied in; -cardboard outer packaging containing a PE inner pack with a PS tray containing up to 12 winged inserts, each winged insert contains a 5g solid bait block. Max Pack size 60g -cardboard outer packaging containing a PE inner pack with a PE molded tray, each tray contains up to forty-eight 5 or 10g solid blocks. Max pack size 480g TRBB

4.1.1. Use-specific instructions for use

-

4.1.2. Use-specific risk mitigation measures

-

4.1.3. Where specific to the use, the particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

-

4.1.4. Where specific to the use, the instructions for safe disposal of the product and its packaging

-

4.1.5. Where specific to the use, the conditions of storage and shelf-life of the product under normal conditions of storage

-

5. GENERAL DIRECTIONS FOR USE¹

5.1. Instructions for use

For indoor use

Bait should be laid for periods of at most 7-10 days.

Keep locked up and out of reach of children.

Keep out of the reach of children and companion animals

Keep away from food, drink and animal feedingstuffs

Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry)

Baits must be securely deposited in a way so as to minimise the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away.

Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and or replenished. Due to the action of this rodenticide this may need to be as often as every few hours.

Dispose of dead rodents in accordance with local requirements.

Remove all baits after treatment and dispose of them in accordance with local requirements.

For use only in tamper-resistant bait stations. Keep containers tightly closed and do not try to open boxes to use the material in any other way than as directed.

For professional use only

5.2. Risk mitigation measures

For indoor use

Bait should be laid for periods of at most 7-10 days.

Keep locked up and out of reach of children.

Keep out of the reach of children and companion animals

Keep away from food, drink and animal feedingstuffs

Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry)

Baits must be securely deposited in a way so as to minimise the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away.

Search for and remove dead rodents at frequent intervals during treatment, at least as often as when baits are checked and or replenished. Due to the action of this rodenticide this may need to be as often as every few hours.

Dispose of dead rodents in accordance with local requirements.

Remove all baits after treatment and dispose of them in accordance with local requirements.

For use only in tamper-resistant bait stations. Keep containers tightly closed and do not try to open boxes to use the material in any other way than as directed.

For professional use only

5.3. Particulars of likely direct or indirect effects, first aid instructions and emergency measures to protect the environment

Ingestion of the product in large quantities may lead to nausea, vomiting, nervous system depression, headache and weakness leading to unconsciousness.

General Advice:

In the event of accidental consumption the patient should be kept quiet and warm and a doctor called. Airways should be kept clear. Avoid sedatives. If cats or dogs are affected, similar first aid treatment should be employed.

First Aid:

Inhalation: Unlikely route of exposure. However, remove patient to fresh air, keep warm and at rest. Apply supportive measures if necessary and seek medical attention.

Eye contact: Rinse affected eye with clean running water, or eyewash solution for at least 15 minutes holding eyelids well apart. Rinse entire surface and do not allow run-off to contaminate unaffected eye. Seek medical attention.

Skin contact: Remove and wash contaminated clothing immediately. Wash affected area thoroughly with soap and water. If the patient feels unwell, seek medical advice.

¹Instructions for use, risk mitigation measures and other directions for use under this section are valid for any authorised uses.

Ingestion: Do NOT induce vomiting. If unconscious place in the recovery position and apply supportive measures if necessary. If conscious give patient up to ½ litre or 1 pint of water to drink. Seek medical advice immediately (show the label where possible).

Note to Physician: Treatment is symptomatic and there is no specific antidote.

Poison Information: For information or to report a poisoning incident contact The National Poisons Information Centre, Beaumont Hospital, Dublin (01-8092166), retain the label for reference.

5.4. Instructions for safe disposal of the product and its packaging

Remove all baits after treatment (waste product) and dispose of as hazardous waste. Under normal circumstances, empty tamper resistant bait boxes, plastic bags and plastic trays may be disposed of after treatment as controlled waste, in accordance with the local requirements.

5.5. Conditions of storage and shelf-life of the product under normal conditions of storage

Store only in the original container

Store in a cool, dry, well-ventilated place

Shelf life of up to 2 years supported.

6. OTHER INFORMATION
