

Justification for removing a substance from CoRAP prior to evaluation

Substance Name (public name): (1-methylethyl)-1,1'-biphenyl

EC Number: 247-156-8

CAS Number: 25640-78-2

Authority: BAuA, Germany

Date: 19/03/2019

The priority for evaluating the substance has been reconsidered based on:

<input checked="" type="checkbox"/>	The initial hazard ground of concern has been verified and considered of low priority
<ul style="list-style-type: none"> • Initial hazard ground for concern: Suspected PBT/vPvB • Recent assessment of the currently available information on persistence for the substance indicates that the fulfilment of the P criterion which would be a crucial element for a potential PBT/vPvB identification and therefore improved risk management measures is relatively unlikely 	

<input checked="" type="checkbox"/>	The initial exposure/risk ground of concern has been verified and considered of low priority
<ul style="list-style-type: none"> • Initial exposure/risk ground of concern: wide dispersive use • The tonnage was updated. The currently disseminated, non-intermediate tonnage for MIPB is given at only 0-10 tpa. This indicates that a wide dispersive use of the substance itself is unlikely based on the most recent information available. No new registrations for MIPB in the Annex VIII tonnage band and below have been made. 	

<input type="checkbox"/>	The generation of information under Substance Evaluation is considered of low priority because
	<input type="checkbox"/> Already ongoing or implemented regulatory risk management process(es) <i>Specify which process(es) and explain, e.g. compliance check, substance evaluation for a larger group, restriction, SVHC identification, others</i>
	<input type="checkbox"/> Registrants' (voluntary) action addresses concern <i>Specify</i>
	<input type="checkbox"/> Other:
